- Q.1 You can't serve data on a hungry man's plate.
आप किसी भूखे आदमी की थाली में डेटा नहीं परोस सकते।
- Q.2 AI is overcoming our mental limitation but not expanding our mental horizon.
ए.आई. मनुष्य की मानसिक सीमाओं को नियंत्रित रहा है, किंतु मानसिक क्षितिज का विस्तार नहीं कर रहा है।
- Q.3 We are using environment for politics, not politics for environment.
हम पर्यावरण का उपयोग राजनीति के लिए कर रहे हैं, न कि राजनीति का उपयोग पर्यावरण के लिए।
- Q.4 The worst form of inequality is to try to make unequal things equal.
असमानता का सबसे बुरा रूप है असमान को समान बनाने का प्रयास।

⑤ You Can't serve data on a hungry man's Plate

It was a fine dusky morning in a tribal dominated village Koda in Jharkhand. ^{Suddenly} ~~when~~ Jaikoo Munda became conscious and when he opened his eyes, he saw his daughter crying and villagers surrounding him.

He asked his wife what happened? Why so many people and black magician 'baba' is here? His wife replied that last evening you had a

fight with local PDS owner goons as our ration authentication failed due to fingerprint mismatch and they did not give food to us.

Due to the fight you lost your consciousness and we called local baba to treat you with his black magics. Villagers are here to know about your recovery.

Suddenly, he realised that he has to drop his owner to ^{the} office. So he quickly dressed up in his professional driver attire and went to pick his owner.

His owner, Mr Cristo, lived in a AI powered house with high tech CCTV enabled surveillance. He picked Mr Cristo and both were on road when Mr Cristo commanded Alexa in his car dashboard to update him regarding

today's news, Alexa replied, "today's breaking news is that Data Protection bill (GDPR) has been passed in European Union".

Taikoo intervened and asked ~~to~~ Mr Cristo, Sir what is data? and what is the data protection bill?

He replied, data, in this context is any information which is being uploaded, stored, transferred or being used is called data.

He further added that definition of data is not only limited to digital world. Data was present even before digital age also. The records we use to maintain in our register book is also a data.

Taikoo explained and ~~said~~ again asked Ooho! Is the information only in written form called data? Mr Cristo replied,

No, Data can be anything, written or unwritten. Even when we are talking information is being transferred from our ears to brains via network of neurons in the form of data. This was the exact means through which our traditional Vedic knowledge got transferred over the years.

Even when Vedantic philosopher Sri Shankaracharya, listened to the Unheard voice of cosmos through Yoga, that was also data.

Even present day Unseen God particles, anti neutrino, in universe is pattern of data.

Taikoo seems confused and further ~~too~~ jokingly asked, ~~Sir, what~~ Sir, it seems data is a thing of elite class, what will we poor do with this data when our stomach are empty?

Mr Cristo replied, data is equally important for poor people. It helps government in eradication of poverty

Taikoo, a curious man again asked, Sir, how? Mr. Cristo replied, Government is running various schemes based on data driven policy making. One such scheme is MNREGA where according to satellite data projects are mapped and employment is given to poor unskilled labourers. Even their salary is paid through online Direct benefit transfer.

While explaining, suddenly Mr Cristo saw bruises in Taikoo's hands and asked him about it. Taikoo narrated the entire previous day incident.

Mr. Cristo, said wait i can practically demonstrate how data is

beneficial for poors. He commanded Alexa to provide results for healthcare facility for poors. Alexa recommended free, upto 5 lakh, Ayushman Bharat scheme for Jaikoo. He further said this will prevent out of pocket expenditure for poors and will even reduce unscientific Black magic as treatment.

Mr. Cristo, further said that even PDS shop where you had fight is run on the basis of data driven policy. Data about quantity, quality of grains, beneficiary details are all based on economic data. Even the digital schools for your daughter under Eklavya Bharat scheme for tribals is based on digital online education.

Government is even mapping and streamlining diverse tribal dialectic

through massive AI powered infrastructure.

During conversation, cars stopped at traffic red signal where few people from LGBTQ community approached them for alms. Mr. Christo, said data is even used for their upliftment also.

Genome sequencing and Biotechnology is being explored to address the issues of LGBTQ community. along with simultaneously integrating them in welfare scheme through satellite based mapping.

Taiko, further asked, sir even though it sounds fancy but what i practically experience is that ^{it} hardly impacts our life.

Mr Christo, in a sad tone said, i know you are right. This is due to various challenges in present day evolving system. To highlight few

He said, the biggest challenge is digital divide among rich and poor, this is further aggravated by high cost of digital services like internet and mobile phone.

On government side, there is lack of quality and reliable data to target beneficiaries, which leads to famous saying that data can't be served on hungry man's plate.

However, government is doing best what they can do, and it is even creating positive impact as it is reflected in recent NITI Aayog's data that in India nearly 34 crore people has been taken out of poverty since first 5 years of Digital India programme.

Suddenly, they entered ~~the~~

a long tunnel road where Alexas GPS navigation crashed. Jaikoo smilingly said, look sir, your digital ~~India~~ mission crashed, but don't worry I know the directions of tunnel, I will navigate you, we should not totally become slave of technology. Even Mr Cristo acknowledged it.

Mr Cristo, further asked in curiosity, Jaikoo what do you need for a happy life? Jaikoo replied Tal, Jungle, Zameen. (Water, forest, land) This is our way of prosperous life.

Mr. Cristo said, Oh! look how government is using data to protect all these things for you people.

For Tal, they created integrated water management system based on annual rainfall data.

Forests are mapped and

preserved via Satellite based
Forest reports. and land parcel is
being tokenised through digital
land records. Interlinking technology
to people centric welfare scheme.

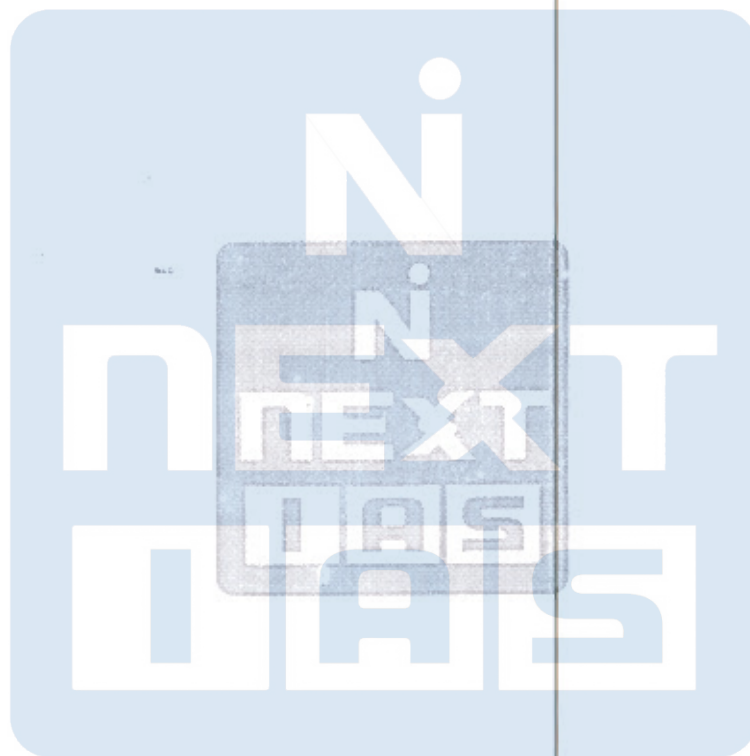

This convinced Jaikoo ~~for~~
that digitalisation, even not seen
immediate benefit to poor, ~~is~~ has a
bright future to eradicate poverty.

However, curious Jaikoo
further asked Mr Gristo, that
Sir, you are having so easily
access and knowledge of technology
and we poor lag in it. ~~Doesn't~~
Don't you think this digitalisation
will ~~even~~ widen this rich-poor
divide?

Mr. Gristo took a deep breath

and passively accepting his line of argument said lets keep this question for some other day side.

- Q.5 Existence is a science, living is an art.
अस्तित्व एक विज्ञान है, जीना एक कला है।
- Q.6 If the truth shall kill them, let them die.
यदि सत्य से किसी की मृत्यु होती है, तो उन्हें मरने दो।
- Q.7 The only way to go beyond things, is to go through them.
हालातों से परे जाने का एकमात्र तरीका उनसे होकर गुजरना है।
- Q.8 Dream for the best. Be prepared for the worst. Enjoy life in between.
सर्वश्रेष्ठ के लिए सपना देखें। सबसे बुरे के लिए तैयार रहें। इसके बीच के जीवन का आनंद लें।

⑦ The only way to go beyond things,
is to go through them

It was a dawn of a
horrific day in distant village.
Childrens are crying, widows are
weeping, crowd of Eagles howling
around the dead bodies of soldiers.
However, it was a party mood in
Ashokas Camp as he conquered the
unconquerable land of Kalinga.

But Ashoka didn't seem happy,

He was tensed, confused and blank. He met a boy who asked him did you become brave by making thousands of children Orphan. This hit Ashoka hard and he decided to quit violence and turn to the path of Buddhism. ~~At~~ That ~~point~~ boy turned King and conquered Ashoka to Devanampiyadasi.

But Ashoka knew that before preaching Dhamma he himself needs to embrace it as

["The only way to go beyond things, is to go through them"]

So, he accepted this with composure and transformed himself entirely in path of Buddhism before preaching it to the world.

As we go through the article first we will see the meaning of the statement, followed by reason why we should follow the wisdom of statement. Next we will look at few challenges in acquiring it and finally look at critical aspect that is this the only way to go ahead.

Going beyond the things

Things in this statement signifies any ideas, preaching, life experience or your aim of life. When Socrates tried to give grand idea of ideal corruption free state, one of the core virtues he told was 'Rule of law' to be followed by all.

When state judiciary convicted him ~~for~~ with death sentence, he had chance to escape but ~~that~~ he choose

to drink hamlock rather evading law.
This reflected that when you want
to go beyond your ideas you need to
go through them.

If Socrates would have ~~not~~
~~been~~ escaped prison, he wouldn't
be called as father of Philosophy and
his ideas wouldn't be relevant.

Similarly, when Parameshwara
Iyer gave the highly ambitious aim
of Swachh Bharat Abhiyan for entire nation
he himself went into manhole to
clean human waste to set example
for others. This is reflected in the
famous quote.

"When words are hollow
and are part with actions
then words are mere words"

Going through them

It is a process where person himself gets into the character he is preaching to show how things are done or to experience the wisdom of his words.

When a mother teaches ~~his~~ her toddler child to walk she herself first walks with four foot to make child learn. This is called going through your word.

Similarly, a sparrow while teaching baby sparrows the method of eating, she herself first mimics the child.

Gautam Budha went for rigorous meditation to realise the truth beyond this materialistic world.

What if we ourselves do not go through the process?

If we ourselves do not go through the process, the idea we preach will reflect incoherence with our actions. It will further reduce your confidence in your words. There will be high chances of failure and most importantly we will not ~~be~~ go beyond things, we will only narrow down and limit our wisdom to specific boundaries. Elon Musk's curiosity in science and he himself working in his ideas led him to chain of ideas ~~and~~, problems and solutions leading him to develop chain of innovative ventures from battery operated

self driving cars to ~~manne~~ dream of human colonies in mars.

Mirabai, herself left the happy life to ~~ex~~ experience the true devotion (Bhakti) by dedicating her life to lord Krishna. and then her preaching inspired thousands of others.

However, many a times Going through the idea is not an option. due to multiple reasons like lack of resources or crisis of time. During COVID vaccine development scientists did not had enough time to walk through their experiments and they had to cut multiple process to develop it quickly.

Now the greatest question arises, is going through ideas is the only way to go beyond things?

It is highly preferred to walk the talk, if you do not do it your legitimacy would be broadly accepted. Babur when called his political war as Jihad, is war of religion. The rational section in his nobility knew the hollowness of his words as he was a frequent alcohol consumer.

However, going through the way is not the only way. Many a times we can ~~to~~ ~~not~~ find alternative way. Scientists have developed large hadron collider experiment to mimic events of creation of world as they cannot themselves go back to time and space.

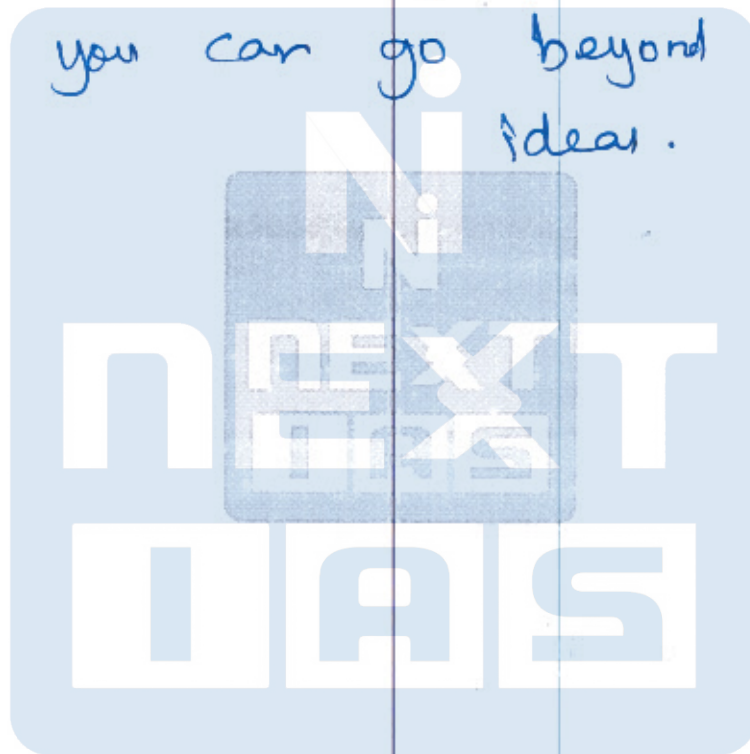

Similarly when Sullivan developed 'Braille' system for blind people, he knew all those blind people cannot go through the process as it leads to hardship. So he developed alternate ready method.

Hence, always going through the process is not the only option you can find alternate way, as ~~scientist~~ DRDO scientist developed simulator nuclear bomb because they cannot ~~test~~ detonate bomb everytime.

In this way, we need to look at things and see how we can project our ideas. Most of the time it is advisable

to turn into Devanami Priyadarshi
 to let from ^{king} Ashoka ~~the~~ because
 you will have more legitimacy
 in your words and your
 actions will reflect your ideas
 and you can go beyond your
 ideas.
