You are the VP (Operations) of a company that manufactures and supplies space probes and satellite equipment to Government space agencies. The company has been in the business for over four decades and has built considerable expertise in producing and delivering high-quality products. The business was good.

As VP of Operations, it was your responsibility to ensure the completion of projects and deliverables on time. A critical deliverable was running behind schedule due to the non-availability of a specific raw material. The material in question was an environmentally hazardous chemical that the Environmental Ministry banned. But considering the importance of the chemical compound for the space industry, the Environment Ministry was planning to allow controlled use in about three weeks. You and the company management didn't have three week waiting time.

Further, there was severe pressure from the Department of Space to complete the deliverable on time as a lot was riding politically on the project. After internal discussions, you met the Space Department officials to explain the predicament and request a deadline extension. When the meeting happened, you were shocked by the attitude of the Department officials. They refused to accept any delay and suggested circumventing the environmental ministry's prohibition and procuring and using the chemical. They justified it by saying the ministry would allow controlled use in a few weeks. So, why wait? Besides, they noted that the environment ministry doesn't understand space priorities and their intricacies. They pointed out that everything is justified in the name of national interest. Option 1: using it before approval can save the company's reputation and deliver the ~~proj~~ project on time, fulfilling National interest. However, not adhering to the regulations might lead to banning the company from future operations.

Option 2: waiting for approval might cost the company the project and also trust from Space Department. However adhering to rules and regulation might save the negative impacts and save the company from legal proceedings.

Option 3 → Talking with Ministry of Environment can lead to fastening of approval & and timely completion of project. However, it is difficult to persuade the Ministry as they are already on the moves.

Option 4 → Talking with Space Department for extension as might be less fruitful as they are more focused political pressure. However if they agree it might help in company's business.

Option 2 will be chosen. This is because as a company it is ethical duty of company to save the environment. Also, it will prevent legal proceeding and banning of the company. The expertise and status of company might help in future project.

d). National Interest means taking action which favours the nation's growth and security and it is considered ethically right.

I do not think it is ethically justified for a nation to prioritise security and economics over, and above social justice and social development priorities.

This is because social justice and social development can enhance welfare of public which in turn enhance the economy and thus it can lead to nation's security.

So, public welfare must be prioritised over security and economy. Morality is relevant in such decision making.

8. आप देश के सबसे बड़े निजी बैंकों में से एक में निवेश बैंकर के रूप में काम कर रहे हैं। आप स्वतंत्र रूप से 15 जूनियर बैंकरों की एक टीम को लीड कर रहे हैं और सीधे निवेश बैंकिंग प्रभाग के प्रमुख को रिपोर्ट करते हैं। आपने नौकरी में रहते हुए कुल परिसंपत्ति और आय में उच्च निवल मूल्य वाले व्यक्तियों के साथ भी नेटवर्क बनाया। नेटवर्किंग का उद्देश्य उन्हें इस बात के लिए राजी करना था कि उनकी आय और परिसंपत्ति का प्रबंधन आपके बैंक द्वारा किया जाए। इन वर्षों में आप बैंक के लिए बहुत सारे ग्राहक ले आये और आपने कुछ बड़े ग्राहकों की परिसंपत्तियों और खातों का प्रबंधन किया।

आपने एक बहुत बड़े व्यावसायिक ग्राहक के खाते का प्रबंधन किया, जिसे अपनी कंपनी के विदेशी खातों से अक्सर धन प्राप्त होता है। पिछले छह महीनों में, आपने देखा कि उसके खाते में काफी संख्या में विदेशी मुद्रा लेनदेन हुए हैं। और यह पैसा आगे चलकर देश के भीतर छोटे–छोटे स्थानों पर ले जाया गया। जब आपने धन की आवाजाही पर नज़र रखी, तो आपने देखा कि धन उन क्षेत्रों में स्थानांतरित किया गया था, जहाँ ग्राहक का कोई व्यावसायिक लेनदेन नहीं था। सरकारी नियमों के अनुसार बैंक को विदेशी मुद्रा निधि के बड़े प्रवाह और ग्राहक विवरण पर रिपोर्ट करने की आवश्यकता होती है। आपने यह विवरण अपने प्रमुख को भेज दिया, जिन्होंने इसे संबंधित अधिकारियों को भेज दिया।

जब लेन–देन लगातार ज़ारी रहा तो आपको संदेह हुआ। जाँच करने पर आपको पता चला कि ग्राहक का राष्ट्र–विरोधी गतिविधियों को वित्त पोषित करने हेतु प्रतिबंधित संगठनों के साथ लेनदेन था। आपने वही जानकारी अपने प्रमुख के साथ साझा की और उनसे अधिकारियों को रिपोर्ट करने का अनुरोध किया। उन्होंने कहा कि वह इस पर गौर करेंगे, परंतु उन्होंने ऐसा नहीं किया। कुछ हफ़्तों के बाद आपने मामला फिर से उठाया और इस बार उन्होंने आपसे रूखेपन से कहा कि नियम यह निर्धारित करते हैं कि खाते की जानकारी प्रदान की जानी चाहिए जो बैंक ने कर दिया है। इसकी जाँच करना और कार्रवाई करना अधिकारियों पर निर्भर है। इसमें बैंक की कोई गलती नहीं है, क्योंकि वह कानून का पालन कर रहा है। इसके अलावा, प्रमुख ने आपको बताया कि ग्राहक से बैंक को अच्छा व्यवसाय मिल रहा है। आप चिंतित थे कि आगे क्या करना है, क्योंकि आप जानते थे कि यह ग्राहक बैंक के व्यवसाय अच्छा है, लेकिन वह वास्तव में अच्छा नहीं है।

(a) इस मामले से जुड़े नैतिक मुद्दे कौन–कौन से हैं?

(b) आपके पास कौन–से विकल्प उपलब्ध हैं?

(c) सभी विकल्पों का विश्लेषण कीजिए और अपने द्वारा चुने हुए विकल्प को स्पष्ट कीजिए।

(d) क्या आपको लगता है कि उपरोक्त मामले में ग्राहक की गोपनीयता और विश्वास के उल्लंघन को उचित ठहराया जा सकता है?

You work as an investment banker with one of the country's biggest private banks. You independently handled a team of 15 junior bankers and reported directly to the Head Investment Banking Division. You also networked with individuals with a high net worth in assets and income as part of your job. The purpose of networking was to persuade them to have their income and assets managed by your bank. Over the years, you had brought in a lot of clients for the bank, and you managed assets and accounts for a few big clients.

You managed a client with a very sizeable business account, and he frequently received remittances from offshore accounts of his company. In the last six months, you could notice a considerable number of forex transactions had happened in his account. And the money was further moved around to smaller locations within the country. When you tracked the money movement, you noticed that funds were transferred to areas where the client had no business dealings. Government regulations required the bank to report a large inflow of forex funds and client details. You forwarded the details to your Head, who forwarded it to the relevant authorities.

When the transactions continued unabated, you got suspicious. On scrutiny, you discovered that the client had dealings with organisations banned by the government for funding anti-national activities. You shared the same information with your Head and requested him to report to the authorities. He said he would look into it. But he didn't. After a few weeks, you raised the matter again, and this time, he curtly told you that the regulations stipulate that account information had to be furnished, which the bank did. It was up to the authorities to scrutinise and take action. The bank was not at fault as it was complying with the law. Further, the Head told you the client was good business for the bank. You were concerned about what to do next as you knew the client was good business, but he was up to no good.

Rashmi worked with an NGO that operated non-residential State wide skill development centres. The organisation's work primarily involved upskilling rescued drug addicts who belong to vulnerable sections of society. The objective was to upskill and rehabilitate them by finding employment opportunities and finally reintegrating them within the community.

Rashmi's responsibilities included counselling the victims and preparing them mentally and emotionally for a new life. The job involved a lot of one-on-one interaction with the addicts, and sometimes she was privy to personal information that others didn't have.

Last month the authorities brought a 23-year-old widow to the centre. As Rashmi interacted with her, she discovered that the widow was introduced to drugs by her husband, who was an addict and had a history of crime. He apparently was killed by drug dealers because of some monetary dispute.

The widow confessed to Rashmi that after the death of her husband, she had started selling drugs to support herself and her 4-year-old. This was a detail the police were unaware of. Further, she revealed that she and her child's life were in danger from the drug dealers her husband owed money to.

In the last month, Rashmi noticed she was diligent in learning and committed to making a fresh start. One day Rashmi saw that she had been absent for almost a week. After asking around, Rashmi discovered that she had been arrested for peddling drugs. Rashmi went to meet her, and the widow became emotional seeing Rashmi and narrated the sequence of events. The widow said she was forced to sell drugs by the dealers to whom her husband owed money, and when she tried telling this to the police authorities, they

refused to believe her and treated her as an accused. She needed help. Rashmi, moved by her plight, went with some of the Senior NGO workers to meet the Senior Officer in Charge to plead the widow's case. Rashmi tried to persuade them that the widow was a victim, not the accused.

1. What are the issues and ethical dilemmas involved in the above case?
2. How would you proceed with the case if you were the officer in charge?
3. Explore relevant options and advise what course of action Rashmi should take.
4. How would you see the widow as a victim of her husband's crime or an accused? Justify.

Thus Rashmi must meet with the senior officials and persuade them to consider the widow as victim

4) I would see the widow as a victim of her husband's crime. This is because, she had a 4 years old child and was constantly threatened. Also, she was vulnerable and did not believe her complaint would be taken seriously.

An influential politician, a third-time MP, was known in his State for his infrastructure development works, especially roads and irrigation canals. Acknowledging his developmental work and goodwill, the Party appointed him the State Party President. Since his Party is also the ruling Party in the State, the MP has started working closely with the Chief Minister. After six months of becoming the Party President, the MP learned that a sizable amount of development funds were diverted to party promotional activities. Further, a few mega-development projects were allocated to the relatives of the CM and a few of his close ministers. You are a senior engineer working for S & P Constructions, a prominent government contractor. You are working at a construction site building a nuclear reactor facility. Along with other responsibilities at the site, you were also the safety in charge. One day as you did your weekly safety audit, you noticed that the welders had not followed procedures and used the wrong materials in some sections. The situation was hazardous since some defective welds appeared on the water pipes carrying coolant to the reactor core. The rupture of the pipes could cause disaster if safety backups failed simultaneously.

You called a meeting of the welding supervisors to instruct them to rectify the faulty weldings. But even after two weeks, the welds were not fixed, and when asked, the supervisors said they had instructions from the superiors to go ahead with the way it is. You were shocked at this compromise of safety. You travelled to the HQ to discuss this with the senior management. Instead of taking corrective action, the senior management transferred you to a different site and warned you about discussing the safety practices of the nuclear site. You needed the job, so you returned to your new workplace quietly.

After five years, the nuclear reactor was in the news for pipe bursts, killing ten engineers and due to the fallout, the neighbouring villages had to be evacuated. You could see your fears coming true. The nuclear facility was shut down, and an inquiry was instituted. You were also summoned for questioning as you handled safety during the construction. You were in a dilemma; tell the truth of safety compromise or hide it and keep the job. Further, your conscience was troubling you that you could have done something five years back instead of quickly taking the transfer.
